### Information about the speaker

Dr. Peter Biza studied Chemistry at the Karl-Franzens-Universität at Graz, Austria. He worked for several years in the R&D department of a paper mill focussing on waste paper processing and mechanical fibres. After that he started to work for Naintsch Mineralwerke, today IMERYS, on pitch and stickies control. In the following years he held numerous positions e.g. as senior development manager paper for the Americas, laboratory manager, Director development paper and specialities, Innovation manager and the last few years was focusing on pulp bleaching developments. Peter Biza is author of numerous publications and patents
